

THERMAL MANAGEMENT
INTERFACE
MATERIALS 2022

CREATING DIMENSIONS

The background is a deep blue gradient, transitioning from a darker shade at the top to a lighter, teal-like shade at the bottom. Overlaid on this are intricate, glowing circuit-like patterns. These patterns consist of thin, light blue lines that branch out and connect various nodes. The nodes are represented by small, bright blue squares and circles, some of which have a soft glow around them. The overall effect is one of high-tech, digital connectivity, reminiscent of a complex microchip or a data network map.

TOTAL THERMAL MANAGEMENT

FOR HEAT DISTRIBUTION & HEAT TRANSFER

PROJECT MANAGEMENT

As project managers, we develop and optimize system solutions for thermal management. We can work with you from initial idea to end product.

How we work: Our approach is to consider all components, taking into account mechanical, thermal, electronic and manufacturing interactions.

We always keep your technical requirements in mind to deliver the best quality and most economical solution.

We serve as a development partner and supplier, in your country and in your language.

TTM stands for solution expertise, project management, purchasing and delivery.

TTM works globally and internationally, from initial idea to series production.

THERMAL SYSTEMS

We create integrated, high-performance thermal solutions for next generation products in a wide range of markets, including power semi-conductors, automotive, energy conversion, medical and test equipment, transportation, defense, aerospace, computers, communications and many other industries.

In doing so, we integrate engineering, CAD, CFD simulation, prototyping, series manufacturing and operations as well as testing and analysis.

TOTAL THERMAL MANAGEMENT

HEAT PIPE ASSEMBLIES

TUBULAR- AND VAPOR CHAMBER PLANAR PIPES<>

HALA supplies 2 Phase Modules of two basic configurations: Tubular Heat Pipes and Vapor Chamber Planar Heat Pipes

HEAT PIPES

- ❑ Outer diameter: From 2.0 mm up to and over 50 mm
- ❑ Internal structures: sintered, mesh, groove or hybrid (sintered-groove)
- ❑ Cross section geometry: round, rectangular, flattened
- ❑ Flatnesses down to 0.4 mm
- ❑ Length: up to 70 cm
- ❑ Geometry: straight or multiple bends
- ❑ Bonding of heat pipes to the assembly: soldering, press fit, epoxy
- ❑ Heat pipe surface coating: nickel or tin plated

All copper/water heat pipes are designed to survive numerous freeze/thaw cycles without any degradation. Copper/water heat pipes are made of copper, use water as a working fluid and typically operate in the temperature range of 20 up to 150°C (and over). The planar heat pipes are called Vapor Chambers (VC) which are used as heat spreaders.

Copper/water 2 phase systems can be combined with other components to form heat transfer modules:

- ❑ Extruded heat sinks
- ❑ Die cast heat sinks
- ❑ Fin Stack heat sinks
- ❑ Skived heat sinks

Connected by:

- ❑ Thermal Interface Materials

Tubular Heat Pipes

Vapor Chamber

Heat Pipe Thermal cycle

High - Environment - Low-Temperature

Heat pipe thermal cycle

- ① Working fluid evaporates to vapor absorbing thermal energy.
- ② Vapor migrates along cavity to lower temperature end.
- ③ Vapor condenses back to fluid and is absorbed by the wick, releasing thermal energy.
- ④ Working fluid flows back to the higher temperature end.

DIMENSION AND PERFORMANCE Range (mm)

Diameter	Recommended Overall Length Range	Recommended Bending Radius	Recommended Flattened Thickness
3	70 – 750	≥9	≥2.0
4	70 – 750	≥12	≥2 (e.g. 2.4)
5	70 – 750	≥15	≥2 (e.g. 3.0)

SILICONE GAP FILLER PAD TGF-M-SI

soft, flexible

TGF-M-SI is an electrically insulating thermally conductive silicone gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. Due to the specific formulation and filling with ceramic particles the silicone elastomer has a very high thermal conductivity. Through its high softness and flexibility the material perfectly mates to irregular surfaces thus filling gaps at low pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly.

PROPERTIES

- ☐ Soft and compliant
- ☐ Thermal conductivity: 2.5 W/mK
- ☐ Operates at low pressure
- ☐ Extraordinary chemical resistance and longterm stability
- ☐ Shock absorbing
- ☐ Easy mounting through self tackiness
- ☐ One or two-side self-tacky

AVAILABILITY

- ☐ Sheet 480 x 460 mm (Thickness 0.5 / 1.0 mm)
- ☐ Sheet 460 x 460 mm (Thickness 2.0 mm)
- ☐ Sheet 450 x 460 mm (Thickness ≥2.5 mm)
- ☐ Tacky on both sides (TGF-MXXXX-SI)
- ☐ Tacky on one side (TGF-MXXXX-SI-A1)
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

- Thermal link of:
- ☐ SMD packages
 - ☐ Through-hole vias
 - ☐ Capacitors
 - ☐ Electronic parts to heat pipes
- For use in Automotive applications / Laptops / Medicine engineering/ Industrial PCs

SILICONE GAP FILLER PAD TGF-R-SI

soft, flexible

TGF-R-SI is an electrically insulating thermally conductive silicone gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. Due to the specific formulation and filling with ceramic particles the silicone elastomer has a very high thermal conductivity. Through its high softness and flexibility the material perfectly mates to irregular surfaces thus filling gaps at low pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly.

PROPERTIES

- ☐ Soft and compliant
- ☐ Thermal conductivity: 3.0 W/mK
- ☐ Operates at low pressure
- ☐ Extraordinary chemical resistance and longterm stability
- ☐ Shock absorbing
- ☐ Easy mounting through self tackiness
- ☐ One or two-side self-tacky

AVAILABILITY

- ☐ Sheet 480 x 460 mm (Thickness 0.5 / 1.0 mm)
- ☐ Sheet 460 x 460 mm (Thickness 2.0 mm)
- ☐ Sheet 460 x 450 mm (Thickness 3.0 / 4.0 / 5.0 mm)
- ☐ Tacky on both sides (TGF-RXXXX-SI)
- ☐ Tacky on one side (TGF-RXXXX-SI-A1)
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

Thermal link of:

- ☐ SMD packages
 - ☐ Through-hole vias
 - ☐ Capacitors
 - ☐ Electronic parts to heat pipes
- For use in Automotive applications/ Laptops / Medicine engineering / Industrial PCs

SILICONE GAP FILLER PAD TGF-U-SI

soft, flexible

TGF-U-SI is an electrically insulating thermally conductive high performance silicone gap filler. It is ideal for use in applications where a very good thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. Due to the specific formulation and filling with ceramic particles the silicone elastomer has an extremely high thermal conductivity. Through its softness and flexibility the material perfectly mates to irregular surfaces thus filling gaps at low pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly.

PROPERTIES

- ☐ Soft and compliant
- ☐ Thermal conductivity: 4.5 W/mK
- ☐ Operates at low pressure
- ☐ Extraordinary chemical resistance and longterm stability
- ☐ Shock absorbing
- ☐ Easy mounting through self tackiness

AVAILABILITY

- ☐ Sheet 300 x 400 mm
- ☐ Tacky on both sides (TGF-UXXXX-SI)
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

- Thermal link of:
- ☐ SMD packages
 - ☐ Through-hole vias
 - ☐ RDRAMs Smemory modules
 - ☐ Flip Chips, DSPs, BGAs, PPGAs
- For use in Automotive applications / Laptops / Medicine engineering / Embedded boards

SILICONE GAP FILLER PAD TGF-VS-SI

soft, flexible / Low Volatile Siloxanes (LV)

TGF-VS-SI is an electrically insulating thermally conductive high performance LV silicone gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. Due to the specific formulation and filling with ceramic particles the silicone elastomer has an extremely high thermal conductivity. Through its high softness and flexibility the material perfectly mates to irregular surfaces thus filling gaps at low pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly.

GAP FILLER

PROPERTIES

- ☐ Soft and compliant
- ☐ Low volatile siloxane content (LV)
- ☐ Thermal conductivity: 5.0 W/mK
- ☐ Operates at low pressure
- ☐ Extraordinary chemical resistance and longterm stability
- ☐ Shock absorbing
- ☐ Easy mounting through self tackiness
- ☐ Two-side self-tacky

AVAILABILITY

- ☐ Sheet 400 x 200 mm
- ☐ Tacky on both sides (TGF-VSXXX-SI)
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

Thermal link of:

- ☐ SMD packages
 - ☐ Through-hole vias
 - ☐ RDRAMs memory modules
 - ☐ Flip Chips, DSPs, BGAs, PPGAs
- For use in Automotive applications / Laptops / Medicine engineering / Embedded boards

SILICONE GAP FILLER PAD TGF-XS-SI

soft, flexible / Low Volatile Siloxanes (LV)

TGF-XS-SI is an electrically insulating thermally conductive high performance LV silicone gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. Due to the specific formulation and filling with ceramic particles the silicone elastomer has an extremely high thermal conductivity. Through its softness and flexibility the material perfectly mates to irregular surfaces thus filling gaps at low pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly.

PROPERTIES

- ☐ Soft and compliant
- ☐ Low volatile siloxane content (LV)
- ☐ Thermal conductivity: 6.0 W/mK
- ☐ Operates at low pressure
- ☐ Extraordinary chemical resistance and longterm stability
- ☐ Shock absorbing
- ☐ Easy mounting through self tackiness
- ☐ Two-side self-tacky

AVAILABILITY

- ☐ Sheet 400 x 200 mm (>= 1 mm)
- ☐ Sheet 200 x 200 mm (< 1 mm)
- ☐ Tacky on both sides (TGF-XSXXX-SI)
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

- Thermal link of:
- ☐ SMD packages
 - ☐ Through-hole vias
 - ☐ RDRAMs memory modules
 - ☐ Flip Chips, DSPs, BGAs, PPGAs
- For use in Automotive applications / Laptops / Medicine engineering / Embedded boards

SILICONE GAP FILLER PAD TGF-Z-SI

soft, flexible

TGF-Z-SI is an electrically insulating thermally conductive silicone gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. Due to the specific formulation and filling with ceramic particles the silicone elastomer has an extremely high thermal conductivity. Through its softness and plasticity the material perfectly mates to irregular surfaces thus optimizing the thermal contact at low pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly.

GAP FILLER

PROPERTIES

- ☐ Soft and compliant
- ☐ Thermal conductivity: 11 W/mK
- ☐ Operates at low pressure
- ☐ Extraordinary chemical resistance and longterm stability
- ☐ Shock absorbing
- ☐ Easy mounting through self tackiness
- ☐ One or two-side self-tacky

AVAILABILITY

- ☐ Sheet 200 x 300 mm
- ☐ Tacky on both sides (TGF-ZXXXX-SI)
- ☐ Tacky on one side by talcum coating (TGF-ZXXXX-SI-A1)
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

Thermal link of:

- ☐ SMD packages
 - ☐ Through-hole vias
 - ☐ RDRAMs memory modules
 - ☐ Capacitors

SILICONE GAP FILLER PAD TGF-BXS-SI

ultra soft, flexible

TGF-BXS-SI is an electrically insulating thermally conductive silicone gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. Due to the specific formulation and filling with ceramic particles the silicone elastomer has a good thermal conductivity. Through its ultra softness and flexibility the material perfectly mates to irregular surfaces thus filling gaps at minimum pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly. The optional PSA on one side provides for a strong adhesiveness.

PROPERTIES

- Ultra soft and compliant
- Thermal conductivity: 1.2 W/mK
- Operates at minimum pressure
- Extraordinary chemical resistance and longterm stability
- Shock-absorbing
- Easy mounting through self tackiness
- Two-side tacky or one-side adhesive

AVAILABILITY

- Sheet 200 x 400 mm
- Tacky on both sides (TGF-BXSXXX-SI)
- PSA adhesive on one side (TGF-BXSXXX-SI-A1)
- Die cut parts
- Kiss cut parts on sheet

APPLICATION EXAMPLES

- Thermal link of:
- SMD packages
 - Through-hole vias
 - Capacitors
 - Electronic parts to heat pipes
- For use in Automotive applications / Laptops / Medicine engineering / Industrial PCs

SILICONE GAP FILLER PAD TGF-HUS-SI

extremely soft, flexible

TGF-HUS-SI is an electrically insulating thermally conductive silicone gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. Due to the specific formulation and filling with ceramic particles the silicone elastomer has a good thermal conductivity. Through its extreme softness and flexibility the material perfectly mates to irregular surfaces thus filling gaps at very low pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly.

PROPERTIES

- ☐ Extremely soft and compliant
- ☐ Thermal conductivity: 1.8 W/mK
- ☐ Operates at very low pressure
- ☐ Extraordinary chemical resistance and longterm stability
- ☐ Shock absorbing
- ☐ Easy mounting through self tackiness
- ☐ Two-side self-tacky

SILICONE GAP FILLER PAD TGF-JXS-SI

ultra soft, flexible / Low Volatile Siloxanes (LV)

TGF-JXS-SI is an electrically insulating thermally conductive LV silicone gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. Due to the specific formulation and filling with ceramic particles the silicone elastomer has a high thermal conductivity. Through its ultra softness and flexibility the material perfectly mates to irregular surfaces thus filling gaps at minimum pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly. The material is one-side tacky through lamination with a thermally conductive film.

PROPERTIES

- ☐ Ultra soft and compliant
- ☐ Low volatile siloxane content (LV)
- ☐ No paint wetting impairment
- ☐ Thermal conductivity: 2.0 W/mK
- ☐ Operates at minimum pressure
- ☐ Extraordinary chemical resistance and longterm stability
- ☐ Shock absorbing
- ☐ Easy mounting through self tackiness
- ☐ One-side self-tacky

AVAILABILITY

- ☐ Sheet 210 x 420 mm (0.5 - 3.0 mm)
- ☐ Sheet of 210 x 350 mm (3.5 - 6.0 mm)
- ☐ Tacky on one side by film laminate (TGF-JXSXXX-SI-A1)
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

Thermal link of:

- ☐ SMD packages
 - ☐ Through-hole vias
 - ☐ RDRAMs Smemory modules
 - ☐ Flip Chips, DSPs, BGAs, PPGAs
- For use in Automotive applications / Laptops / Medicine engineering / Embedded boards

SILICONE GAP FILLER PAD TGF-MXS-SI

ultra soft, with or without fibreglass reinforcement

TGF-MXS-SI is an electrically insulating thermally conductive silicone gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. Due to the specific formulation and filling with ceramic particles the silicone elastomer has a high thermal conductivity. Through its ultra softness and flexibility the material perfectly mates to irregular surfaces thus filling gaps at minimum pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly. The optional conductive fibreglass reinforced silicone laminate on one side provides for a high mechanic stability and strength.

PROPERTIES

- ☐ Ultra soft and compliant
- ☐ Thermal conductivity: 2.4 W/mK
- ☐ Operates at minimum pressure
- ☐ Extraordinary chemical resistance and longterm stability
- ☐ Shock absorbing
- ☐ Easy mounting through self tackiness
- ☐ One or two-side self-tacky

AVAILABILITY

- ☐ Sheet 200 x 400 mm
- ☐ Tacky on both sides (TGF-MXSXXX-SI)
- ☐ Tacky on one side by fibreglass reinforced laminate (TGF-MXSXXX-SI-GF)
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

Thermal link of:

- ☐ SMD packages
 - ☐ Through-hole vias
 - ☐ Capacitors
 - ☐ Electronic parts to heat pipes
- For use in Automotive applications / Laptops / Medicine engineering / Industrial PCs

SILICONE GAP FILLER PAD TGF-LSS-SI

very soft, flexible

TGF-LSS-SI is an electrically insulating thermally conductive high performance silicone gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. Due to the specific formulation and filling with ceramic particles the silicone elastomer has a very high thermal conductivity. Through its extraordinary softness and flexibility the material perfectly mates to irregular surfaces thus filling gaps at very low pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly. The material can be mechanically reinforced by a fibreglass mesh inlay or a film laminate with fibreglass or by a PI film laminate.

GAP FILLER

PROPERTIES

- ☐ Extraordinary soft and compliant
- ☐ Thermal conductivity: 2.5 W/mK
- ☐ Operates at very low pressure
- ☐ Extraordinary chemical resistance and longterm stability
- ☐ Shock absorbing
- ☐ Easy mounting through self tackiness
- ☐ Two-side self-tacky

AVAILABILITY

- ☐ Sheet 200 x 400 mm
- ☐ Two-side self-tacky (TGF-LSSXXX-SI)
- ☐ With fibreglass mesh inlay (TGF-LSSXXX-SI-GF)
- ☐ With fibreglass reinforced film laminate (TGF-LSSXXX-SI-LGF)
- ☐ With PI film laminate (TGF-LSSXXX-SI-LPI)
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

Thermal link of:

- ☐ SMD packages
 - ☐ Through-hole vias
 - ☐ RDRAMs memory modules
 - ☐ Flip Chips, DSPs, BGAs, PPGAs
- For use in Automotive applications / Laptops / Medical engineering / Embedded boards / Graphic cards / Memory modules / LED light / LCD and plasma TV

SILICONE GAP FILLER PAD TGF-USS-SI

very soft, flexible / Low Volatile Siloxanes (LV)

TGF-USS-SI is an electrically insulating thermally conductive high performance LV silicone gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. Due to the specific formulation and filling with ceramic articles the silicone elastomer has a very high thermal conductivity. Through its ultra softness and flexibility the material perfectly mates to irregular surfaces thus filling gaps at minimum pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly. The material is one-side tacky through lamination with a thermally conductive film.

GAP FILLER

PROPERTIES

- ☐ Ultra soft and compliant
- ☐ Low volatile siloxane content (LV)
- ☐ No paint wetting impairment
- ☐ Thermal conductivity: 3.3 W/mK
- ☐ Operates at minimum pressure
- ☐ Extraordinary chemical resistance and longterm stability
- ☐ Shock absorbing
- ☐ Easy mounting through self tackiness
- ☐ One-side self-tacky

AVAILABILITY

- ☐ Sheet 200 x 200 mm (0.5 - 3.0 mm)
- ☐ Sheet 200 x 400 mm (0.5 - 3.0 mm)
- ☐ Tacky on one side by film laminate (TGF-USSXXX-SI-A1)
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

Thermal link of:

- ☐ SMD packages
 - ☐ Through-hole vias
 - ☐ RDRAMs memory modules
 - ☐ Flip Chips, DSPs, BGAs, PPGAs
- For use in Automotive applications / Laptops / Medicine engineering / Embedded boards

SILICONE GAP FILLER PAD TGF-DXS-SI-GF

ultra soft, with fibreglass reinforcement

TGF-DXS-SI-GF is an electrically insulating thermally conductive silicone gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. Due to the specific formulation and filling with ceramic particles the silicone elastomer has a good thermal conductivity. Through its ultra softness and flexibility the material perfectly mates to irregular surfaces thus filling gaps at minimum pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly. The conductive fibreglass reinforced silicone laminate on one side provides for a high mechanic stability and strength.

GAP FILLER

PROPERTIES

- ☐ Ultra soft and compliant
- ☐ Thermal conductivity: 1.3 W/mK
- ☐ Operates at minimum pressure
- ☐ Extraordinary chemical resistance and longterm stability
- ☐ Shock absorbing
- ☐ Easy mounting through self tackiness
- ☐ One side self-tacky

SILICONE GAP FILLER PAD TGF-EXS-SI-GF

ultra soft, flexible

TGF-EXS-SI-GF is an electrically insulating thermally conductive silicone gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. Due to the specific formulation and filling with ceramic particles the silicone elastomer has a high thermal conductivity. Through its ultra softness and flexibility the material perfectly mates to irregular surfaces thus filling gaps at minimum pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly. The conductive fiberglass reinforced silicone laminate on one side allows for a high mechanic stability and strength.

PROPERTIES

- ❑ Ultra soft and compliable
- ❑ Thermal conductivity: 1.4 W/mK
- ❑ Operates at minimum pressure
- ❑ Extraordinary chemical resistance and longterm stability
- ❑ Shock absorbing
- ❑ Easy mounting through self tackiness
- ❑ One-side self-tacky

AVAILABILITY

- ❑ Sheet 300 x 400 mm
- ❑ Tacky on one side by fibreglass reinforced laminate (TGF-EXSXXX-SI-GF)
- ❑ Die cut parts
- ❑ Kiss cut parts on sheet

APPLICATION EXAMPLES

- Thermal link of:
- ❑ SMD packages
 - ❑ Through-hole vias
 - ❑ RDRAMs Smemory modules
 - ❑ Flip Chips, DSPs, BGAs, PPGAs
- For use in Automotive applications / Laptops / Medicine engineering / Embedded boards

SILICONE GAP FILLER TGF-YP-SI

plastic

TGF-YP-SI is an electrically insulating thermally conductive very high performance silicone gap filler. It is ideal for use in applications where a very good thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. Due to the specific formulation and filling with ceramic particles the silicone elastomer has an outstandingly high thermal conductivity. Through its softness and plasticity the material perfectly mates to irregular surfaces thus filling gaps at low pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly.

GAP FILLER

PROPERTIES

- ☐ Plastic
- ☐ Soft and compliant
- ☐ Thermal conductivity: 7.0 W/mK
- ☐ Extraordinary chemical resistance and longterm stability
- ☐ Two-side self-tacky

AVAILABILITY

- ☐ Sheet 460 x 100 mm
- ☐ Tacky on both sides (TGF-YPXXX-SI)
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

Thermal link of:

- ☐ SMD packages
 - ☐ Through-hole vias
 - ☐ Capacitors
 - ☐ Electronic parts to heat pipes
- For use in Automotive applications / Laptops / Medicine engineering / Industrial PCs

SILICONE GAP FILLER TGF-ZP-SI

plastic

TGF-ZP-SI is an electrically insulating thermally conductive silicone gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. Due to the specific formulation and filling with ceramic particles the silicone elastomer has an extremely high thermal conductivity. Through its extreme softness and plasticity the material perfectly mates to irregular surfaces thus filling gaps at almost zero pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly.

PROPERTIES

- ☐ Plastic
- ☐ Extremely soft and compliant
- ☐ Thermal conductivity: 11 W/mK
- ☐ Operates at almost zero pressure
- ☐ For minimal gaps
- ☐ Extraordinary chemical resistance and longterm stability
- ☐ Easy mounting through self tackiness

AVAILABILITY

- ☐ Sheet 300 x 200 mm
- ☐ Tacky on both sides (TGF-ZPXXXX-SI)
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

- Thermal link of:
- ☐ SMD packages
 - ☐ Through-hole vias
 - ☐ RDRAMs memory modules
 - ☐ Capacitors
- For use in Automotive applications / Laptops / Medicine engineering / Embedded boards

SILICONE GAP FILLER PAD TEL-R-SI

highly thermally conductive elastomer / Low Volatile Siloxanes (LV)

TEL-R-SI is a low dielectric, high performance thermally conductive LV silicone gap filler for an optimised thermal coupling between electronic packages and heat sinks even over large gaps or big tolerances. Through the specific formulation and filling with highly thermally conductive particles an extraordinary high anisotropic thermal conductivity is reached. Its conformal surface structure and extreme softness guarantee a very good compliance to the contact surfaces at very low pressure. Thus the total thermal resistance is minimised. The elastomer shows a low dielectric strength.

PROPERTIES

- ☐ High surface compliance and extremely soft
- ☐ Low volatile siloxane content (LV)
- ☐ Thermal conductivity: 15 W/mK (anisotropic)
- ☐ Low dielectric
- ☐ Extraordinary chemical resistance and longterm stability
- ☐ Shock absorbing

AVAILABILITY

- ☐ Sheet 150 x 150 mm (Thickness 0.5 – 1.5 mm)
- ☐ Sheet 140 x 140 mm (Thickness 2.0 – 3.0 mm)
- ☐ Double-side self tacky (TEL-RXXXX-SI)
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

Thermal link of:

- ☐ MOSFETs und IGBTs
- ☐ Power diodes or AC/DC converters
- ☐ Power modules
- ☐ CPUs

For use in Switch mode power supplies / Motor control units / Automotive engine management systems / UPS units / Solar systems

2-PART SILICONE GAP FILLER TDG-L-SI-2C-Y

dispensable / 2 parts / Low Volatile Siloxanes (LV) / Form-in-Place

TDG-L-SI-2C-Y is a 2-part dispensable low volatile LV silicone gap filler which is filled with thermally conductive fillers. After curing under heat the system remains elastic. It is characterised by very good dielectric and mechanic properties and is suited for compensating extreme tolerances and spaces at non-coplanar systems. Its thixotropic behaviour allows for a definite placement and cure-in-place. It has a natural low level tack that enhances a good thermal contact. Due to its negligible and controlled volatile content it is suited for environments where volatile silicones and paint wetting impairment are critical.

GAP FILLER

PROPERTIES

- ☐ Dispensable 2-part silicone
- ☐ Low volatile siloxane content (LV)
- ☐ No paint wetting impairment
- ☐ Thermal conductivity: 2.0 W/mK
- ☐ Remains elastic after polymerisation
- ☐ Zero stress on components
- ☐ Heat accelerated curing
- ☐ Shock absorbing

AVAILABILITY

- ☐ Optional in blue colour: TDG-L-SI-2C
- ☐ Cartridges 2 x 25 ml / 2 x 100 ml / 2 x 200 ml / 2 x 600 ml
- ☐ Pail 2 x 25 kg / 2 x 35 kg
- ☐ On request

APPLICATION EXAMPLES

Thermal link of:

- ☐ FPBGA
- ☐ Capacitors
- ☐ Heat Pipes
- ☐ BGA

For use in Automotive applications / Telecommunication / Multimedia / Industrial PCs

2-PART SILICONE GAP FILLER TDG-W-SI-2C

dispensable / 2 parts / Low Volatile Siloxanes (LV) / Form-in-Place

TDG-W-SI-2C is a 2-part dispensable low volatile LV silicone gap filler which is filled with thermally conductive fillers. After curing under heat the system remains elastic. It is characterised by very good dielectric and mechanic properties and is suited for compensating extreme tolerances and spaces at non-coplanar systems. Its thixotropic behaviour allows for a definite placement and cure-in-place. It has a natural low level tack that enhances a good thermal contact. Due to its negligible and controlled volatile content it is suited for environments where volatile silicones and paint wetting impairment are critical.

PROPERTIES

- ☐ Dispensable 2-part silicone
- ☐ Low volatile siloxane content (LV)
- ☐ No paint wetting impairment
- ☐ Thermal conductivity: 4.5 W/mK
- ☐ Remains elastic after polymerisation
- ☐ Zero stress on components
- ☐ Heat accelerated curing
- ☐ Shock absorbing

AVAILABILITY

- ☐ Cartridges 2 x 25 ml / 2 x 100 ml / 2 x 200 ml / 2 x 600 ml
- ☐ Pail 2 x 25 kg
- ☐ On request

APPLICATION EXAMPLES

- Thermal link of:
- ☐ FPBGA
 - ☐ Capacitors
 - ☐ Heat Pipes
 - ☐ BGA
- For use in Automotive applications / Telecommunication / Multimedia / Industrial PCs

SILICONE GAP FILLER / PUTTY TGL-W-SI

dispensable

TGL-W-SI is an electrically insulating thermally conductive, highly viscous dispensable form-in-place gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. The ready-made compound does not require an additional curing process. Due to the specific formulation and filling with ceramic particles the material has a very high thermal conductivity. After dispensing the viscoplastic material leads to an optimum thermal contact at no pressure. By its use the total thermal resistance is minimised.

PROPERTIESEN

- ☐ Dispensable
- ☐ Almost zero pressure at assembly due to viscoplasticity
- ☐ Thermal conductivity: 5.5 W/mK
- ☐ Ready-made, no additional curing required

AVAILABILITY

- ☐ Cartridge 30 ml
- ☐ Tube 250 g
- ☐ Pail 2 kg
- ☐ Others on request

APPLICATION EXAMPLES

Thermal link of:

- ☐ SMD packages
- ☐ Through-hole vias
- ☐ RDRAMs memory modules
- ☐ Flip Chips, DSPs, BGAs, PPGAs

For use in Automotive applications / Laptops / Medicine engineering / Industrial PCs

SILICONE-FREE GAP FILLER PAD TGF-R-NS

siloxane-free, soft acrylate

TGF-R-NS is an electrically insulating highly thermally conductive silicone-free gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. The acrylate based elastomer does not contain any volatile siloxanes which are inevitably emitted by silicones. Due to the specific formulation and filling with ceramic particles the material has a high thermal conductivity. Through its softness the material perfectly mates to irregular surfaces thus filling gaps and operates at low pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly.

PROPERTIES

- ☐ Silicone-free acrylate
- ☐ No emission of volatile siloxanes
- ☐ Soft and compliant
- ☐ Thermal conductivity: 3.0 W/mK
- ☐ Shock absorbing
- ☐ Easy mounting through self-tackiness

AVAILABILITY

- ☐ Sheet 400 x 200 mm
- ☐ Double-side tacky (TGF-RXXXX-NS)
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

Thermal link of:

- ☐ SMD packages
 - ☐ Through-hole vias
 - ☐ RDRAMs memory modules
 - ☐ Electronic parts to heat pipes
- For use in Automotive applications / Laptops / Medicine engineering / Industrial PCs

SILICONE-FREE GAP FILLER PAD TGF-V-NS

siloxane-free, soft acrylate

TGF-V-NS is an electrically insulating extremely thermally conductive silicone-free gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. The acrylate based elastomer does not contain any volatile siloxanes which are inevitably emitted by silicones. Due to the specific formulation and filling with ceramic particles the material has an extremely high thermal conductivity. Through its softness the material perfectly mates to irregular surfaces thus filling gaps and operates at low pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly. The material is double-side tacky or alternatively one-side tacky through lamination with a transparent film.

PROPERTIES

- ☐ Silicone-free acrylate
- ☐ No emission of volatile siloxanes
- ☐ Soft and compliant
- ☐ Thermal conductivity: 5 W/mK
- ☐ Shock absorbing
- ☐ Easy mounting through self-tackiness
- ☐ One or two-side self tacky

AVAILABILITY

- ☐ Sheet 510 x 210 mm
- ☐ Double-side tacky (TGF-VXXXX-NS) ≥ 1.0 mm
- ☐ Tacky on one side by film laminate (TGF-VXXXX-NS-F) ≥ 0.5 mm
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

- Thermal link of:
- ☐ SMD packages
 - ☐ Through-hole vias
 - ☐ RDRAMs memory modules
 - ☐ Electronic parts to heat pipes
- For use in Automotive applications / Lap-tops / Medicine engineering / Industrial PCs

SILICONE-FREE GAP FILLER PAD TGF-GUS-NS

siloxane-free, extremely elastic TPE

TGF-GUS-NS is an electrically insulating thermally conductive silicone-free gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. The TPE polymer based elastomer does not contain any volatile siloxanes which are inevitably emitted by silicones. Due to the specific formulation and filling with ceramic particles the material has a high thermal conductivity. Through its extreme softness the material perfectly mates to irregular surfaces thus filling gaps and operates at very low pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly.

PROPERTIES

- ☐ Silicone-free TPE polymer
- ☐ Extremely soft and compliant
- ☐ Thermal conductivity: 1.5 W/mK
- ☐ Operates at very low pressure
- ☐ Shock absorbing
- ☐ Easy mounting through self tackiness
- ☐ Two-side self-tacky

AVAILABILITY

- ☐ Sheet 300 x 200 mm
- ☐ Tacky on both sides (TGF-GUSXXX-NS)
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

Thermal link of:

- ☐ SMD packages
 - ☐ Through-hole vias
 - ☐ RDRAMs memory modules

SILICONE-FREE GAP FILLER PAD TGF-IXS-NS

siloxane-free, extremely soft acrylate

TGF-IXS-NS is an electrically insulating thermally conductive silicone-free gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. The acrylate based elastomer does not contain any volatile siloxanes which are inevitably emitted by silicones. Due to the specific formulation and filling with ceramic particles the material has a high thermal conductivity. Through its extreme softness the material perfectly mates to irregular surfaces thus filling gaps and operates at very low pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly. The material is one-side tacky through lamination with a transparent film.

PROPERTIES

- ☐ Multilayer silicone-free acrylate: Soft-Ultrasoft-Film
- ☐ No emission of volatile siloxanes
- ☐ Extremely soft and compliable
- ☐ Thermal conductivity: 2 W/mK
- ☐ Operates at very low pressure
- ☐ Shock absorbing
- ☐ Easy mounting through self tackiness
- ☐ One-side self-tacky

AVAILABILITY

- ☐ Sheet 525 x 210 mm
- ☐ Tacky on one side by film laminate (TGF-IXSXXX-NS-F)
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

SILICONE-FREE GAP FILLER PAD TGF-NSS-NS

siloxane-free, very soft acrylate

TGF-NSS-NS is an electrically insulating thermally conductive silicone-free gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. The acrylate based elastomer does not contain any volatile siloxanes which are inevitably emitted by silicones. Due to the specific formulation and filling with ceramic particles the material has a high thermal conductivity. Through its extraordinary softness the material perfectly mates to irregular surfaces thus filling gaps and operates at very low pressure. By its use the total thermal resistance is minimised. The natural tackiness of the material allows for an easy and reliable pre-assembly. The material is double-side tacky or alternatively one-side tacky through lamination with a transparent film.

PROPERTIES

- ☐ Silicone-free acrylate
- ☐ No emission of volatile siloxanes
- ☐ Extremely soft and compliant
- ☐ Thermal conductivity: 2.5 W/mK
- ☐ Operates at very low pressure
- ☐ Shock absorbing
- ☐ Easy mounting through self tackiness
- ☐ One-side self-tacky

AVAILABILITY

- ☐ Sheet 510 x 210 mm
- ☐ Tacky on both sides (TGF-NSSXXX-NS) ≥ 2.0 mm
- ☐ Tacky on one side by film laminate (TGF-NSSXXX-NS-F)
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

Thermal link of:

- ☐ SMD packages
 - ☐ Through-hole vias
 - ☐ RDRAMs memory modules
 - ☐ Electronic parts to heat pipes
- For use in Automotive applications / Laptops / Medicine engineering / Industrial PCs

SILICONE-FREE GAP FILLER PAD TGF-XP-NS

siloxane-free, plastic

TGF-XP-NS is an electrically insulating extremely thermally conductive silicone-free gap filler. It is ideal for use in applications where thermal transfer over large gaps caused e.g. by big tolerances or different stack up heights must be achieved. The butadiene elastomer as base does not contain any volatile siloxanes which are inevitably emitted by silicones. Due to the specific formulation and filling with ceramic particles the material has an extremely high thermal conductivity. Through its softness and plasticity the material perfectly mates to irregular surfaces thus filling gaps and operates at low pressure. By its use the total thermal resistance is minimised.

PROPERTIES

- ☐ Silicone-free
- ☐ No emission of siloxanes through silicone-freeness
- ☐ Soft and compliant
- ☐ Thermal conductivity: 7 W/mK

AVAILABILITY

- ☐ Sheet 100 x 100 mm
- ☐ Double-side tacky (TGF-XPXXX-NS)
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

- Thermal link of:
- ☐ SMD packages
 - ☐ Through-hole vias
 - ☐ RDRAMs memory modules
 - ☐ Electronic parts to heat pipes

SILICONE FOIL TFO-D-SI

fibreglass reinforced, highly dielectric

TFO-D-SI is an electrically insulating thermally conductive silicone foil for an optimised thermal coupling between electronic packages and heat sinks. Through the specific formulation and filling with thermally conductive ceramic particles a high thermal conductivity is reached. Under pressure the total thermal resistance is minimised. The material is characterised by its very high dielectric properties. The fibreglass reinforcement provides for an outstanding mechanic stability and cut-through resistance as well as easy handling. For an easy and reliable pre-assembly the interface material is available with self tackiness on one side with no need for an additional adhesive coating or with a one side adhesive coating.

PROPERTIES

- ☐ Thermal conductivity: 1.2 W/mK
- ☐ High thermal contact
- ☐ Outstanding mechanic stability through fibreglass reinforcement
- ☐ Very high dielectric strength
- ☐ Extraordinary chemical resistance and longterm stability
- ☐ Residue-free removal after use

AVAILABILITY

- ☐ Sheet 300 x 1000 mm
- ☐ Roll 300 mm x 50 m
- ☐ Non tacky (TFO-DXXX-SI)
- ☐ Self tacky on one side without adhesive coating (TFO-DXXX-SI-A0)
- ☐ One side adhesive (TFO-DXXX-SI-A1)
- ☐ Die cut parts
- ☐ Kiss cut parts on roll
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

Thermal link of:

- ☐ MOSFETs or IGBTs
- ☐ Power diodes or AC/DC converters
- ☐ Power modules

For use in Switch mode power supplies / Motor control units / Automotive engine management systems / UPS units / Solar systems

SILICONE FOIL TFO-T-SI

fibreglass reinforced

TFO-T-SI is a high performance electrically insulating thermally conductive silicone foil for an optimised thermal coupling between electronic packages and heat sinks. Through the specific formulation and filling with highly thermally conductive ceramic particles a very high thermal conductivity is reached. Its conformal surface structure guarantees a very good compliance to the contact surfaces. Thus the total thermal resistance is minimised. The fibreglass reinforcement provides for an outstanding mechanic stability and cutthrough resistance as well as easy handling. For an easy and reliable preassembly the interface material is available with low tack pressure sensitive adhesive on one side.

PROPERTIES

- Thermal conductivity: 4.1 W/mK
- High surface compliance
- Excellent thermal contact
- Outstanding mechanic stability through fibreglass reinforcement
- Extraordinary chemical resistance and longterm stability
- Residue-free removal after use

AVAILABILITY

- Sheet 440 x 510 mm
- Non tacky (TFO-TXXX-SI)
- Tacky on one side (TFO-TXXX-SI-A1)
- Die cut parts
- Kiss cut parts on sheet

APPLICATION EXAMPLES

- Thermal link of:
- MOSFETs or IGBTs
 - Power diodes or AC/DC converters
 - Power modules
- For use in Switch mode power supplies / Motor control units / Automotive engine management systems / UPS units / Solar systems

SILICONE FOIL TFO-X-SI

fibreglass reinforced

TFO-X-SI is a high performance electrically insulating thermally conductive silicone foil for an optimised thermal coupling between electronic packages and heat sinks. Through the specific formulation and filling with highly thermally conductive ceramic particles an excellent thermal conductivity is reached. Its conformal surface structure guarantees a very good compliance to the contact surfaces. Thus the total thermal resistance is minimised. The fibreglass reinforcement provides for an outstanding mechanic stability and cutthrough resistance as well as easy handling. For an easy and reliable preassembly the interface material is available with low tack pressure sensitive adhesive on one side.

PROPERTIES

- ☐ Thermal conductivity: 5.0 W/mK
- ☐ High surface compliance
- ☐ Excellent thermal contact
- ☐ Outstanding mechanic stability through fibreglass reinforcement
- ☐ Extraordinary chemical resistance and longterm stability
- ☐ Residue-free removal after use

AVAILABILITY

- ☐ Sheet 440 x 510 mm
- ☐ Non tacky (TFO-XXXX-SI)
- ☐ Tacky on one side (TFO-XXXX-SI-A1)
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

Thermal link of:

- ☐ MOSFETs or IGBTs
- ☐ Power diodes or AC/DC converters
- ☐ Power modules

For use in Switch mode power supplies / Motor control units / Automotive engine management systems / UPS units / Solar systems

INSULATING FILM TFO-M-SI-PI

silicone coated, highly dielectric

TFO-M-SI-PI is an electrically insulating thermally conductive foil made of a high voltage resistant Polyimide film with thermally conductive silicone coating on both sides for an optimised thermal coupling between electronic packages and heat sinks. Through the specific formulation and filling with thermally conductive ceramic particles a very high thermal conductivity is reached. Under pressure the total thermal resistance is minimised. The material is characterised by its very high dielectric properties. The substrate film provides for an outstanding mechanic stability and cutthrough resistance as well as easy handling.

PROPERTIES

- ☐ High thermal contact
- ☐ Very high dielectric strength
- ☐ Outstanding mechanic stability through substrate film
- ☐ Extraordinary chemical resistance and longterm stability
- ☐ Residue-free removal after use

AVAILABILITY

4 PHASE CHANGE MATERIAL

/ POLYIMIDE FILM COATED /
ALUMINUM FILM COATED /
FILM

POLYIMIDE FILM/PHASE CHANGE TPC-N-PI

phase change coating, highly dielectric

TPC-N-PI is a thermally conductive film with an electrically insulator made of Devinall TH Polyimide which is coated with a thermally conductive phase changing compound on both sides thus optimising the thermal path e.g. between electronic packages and heat sinks. During warm-up the phase change coating starts filling up surface-specific roughnesses and unevennesses and expels any air enclosures from micro structures even at low pressure. The wetting of the contact areas is further on improved by volumetric material expansion of approximately 10 to 15% at increasing temperature. Thus the total thermal resistance is minimised. The material is characterised by its very high dielectric properties.

PROPERTIES

- ☐ Optimal thermal contact
- ☐ High dielectric strength
- ☐ Silicone-free
- ☐ No dry up, pump-out migration
- ☐ No run-out through thixotropic properties
- ☐ Process reliable coating thickness
- ☐ Ideal replacement of messy thermal grease

AVAILABILITY

- ☐ Sheet 305 x 495 / 610 x 495 mm
- ☐ Roll 495 mm x 152 m
- ☐ Non tacky (TPC-NXXX-PI)
- ☐ Tacky on one side with PSA (TPC-NXXX-PI-A1)
- ☐ With adhesive strips on request
- ☐ Thicker phase coating (25 µm)
- ☐ Die cut parts
- ☐ Kiss cut parts

APPLICATION EXAMPLES

- Thermal link of:
- ☐ MOSFETs or IGBTs
 - ☐ Diodes
 - ☐ A.C. converter
 - ☐ Uninsulated power modules
- For use in Automotive motor control units / Power supplies / Traction drives / Telecom appliances

PHASE CHANGE TPC-W-PC

as stand alone or with substrate

TPC-W-PC is thermally conductive phase changing film optimising the thermal path e.g. between electronic packages and heat sinks. During warm-up the phase change compound starts filling up surface-specific roughnesses and unevenesses and expels any air enclosures from micro structures even at very low pressure. The material is available as TPC-W-PC as free standing film or with different substrates thus reworkability is improved since no compound residues remain on one side.

PROPERTIES

- ☐ Optimal thermal contact
- ☐ Thermal conductivity: 3.5 W/mK
- ☐ Silicone-free
- ☐ Ideal alternative and replacement of messy thermal grease
- ☐ Different optional substrates allow for one-side residue-freeness and improved reworkability

AVAILABILITY

- ☐ Sheet 305 x 152 mm
- ☐ Roll 356 mm (Liner 394 mm) x L (up to 150 m)
- ☐ TPC-WXXX-PC: Die cut parts between 2 release liners
- ☐ One-side coated substrates: Aluminum TPC-WXXX-PC-ALYYY Copper TPC-WXXX-PC-CUYYY

APPLICATION EXAMPLES

- Thermal link of:
- ☐ MOSFETs or IGBTs
 - ☐ Memory modules
 - ☐ Power modules
 - ☐ CPUs
- For use in Servo drive control units / Computers / Automation appliances / Microelectronics

ALUMINUM FILM WITH PHASE CHANGE TPC-R-AL

phase change coating

TPC-R-AL is an aluminum film which is coated with a thermally conductive phase changing compound on both sides thus optimising the thermal path e.g. between electronic packages and heat sinks. During warm-up the phase change coating starts filling up surface-specific roughnesses and unevennesses and expels any air enclosures from micro structures even at low pressure. The wetting of the contact areas is further improved by volumetric material expansion at increasing temperature. Thus the total thermal resistance is minimised. The aluminum carrier effects high mechanical stability and easy handling.

PROPERTIES

- ☐ Optimal thermal contact
- ☐ Silicone-free
- ☐ Process reliable coating thickness
- ☐ Ideal alternative and replacement of messy thermal grease

AVAILABILITY

- ☐ Sheet 305 x 610 mm or 457 x 610 mm
- ☐ Roll 292 or 445 mm x 152 m
- ☐ Non tacky (TPC-RXXX-AL)
- ☐ Tacky on one side with PSA (TPC-RXXX-AL-A1)
- ☐ With adhesive strips on request
- ☐ Optional AL (25 / 51 / 76 / 127 / 254 μm), phase change coating (13 / 25 / 51 μm)
- ☐ Die cut or kiss cut parts

APPLICATION EXAMPLES

Thermal link of:

- ☐ MOSFETs or IGBTs
- ☐ Insulated diodes
- ☐ Power modules
- ☐ CPUs

For use in Servo drive control units / Traction drives / Automation appliances / Micro-electronics

PHASE CHANGE COMPOUND TPC-W-PC-M/-E

printable

TPC-W-PC is a thixotropic thermally conductive phase changing compound optimising the thermal path e.g. between electronic packages and heat sinks. During warm-up the phase change compound starts filling up surface-specific roughnesses and unevenesses and expels any air enclosures from micro structures even at very low pressure. Both thin bondline and high thermal conductivity minimise the total thermal resistance. It can be pre-applied by screen printing. After drying the compound is dry-to-the-touch and ready for use on the thermal contact area. TPC-W-PC-M and TPC-W-PC-E are printable compounds with alternatively long and extended dry times. TPC-W-PC-E dries only at elevated temperature.

PROPERTIES

- ☐ Optimal thermal contact by thin bondline
- ☐ Silicone-free
- ☐ Thermal conductivity: 3.5 W/mK
- ☐ Thixotropic
- ☐ Ideal alternative and replacement of messy thermal grease
- ☐ Accurate automated application by stencil printing for mass production
- ☐ TPC-W-PC-M med dry time: @ RT or elevated temp.
- ☐ TPC-W-PC-E extended dry time: only @ elevated temp.

AVAILABILITY

- ☐ TPC-W-PC-M and TPC-W-PC-E: Printable type med dry -M and extended dry -E
- ☐ -E dries at elevated temperature only
- ☐ 360 ml SEMCO cartridges (transparent)
- ☐ 30 ml syringes

APPLICATION EXAMPLES

PHASE CHANGE COMPOUND TPC-X-PC-NC-HT-M/-E

printable, dielectric

TPC-X-PC-NC-HT-M/-E is a thixotropic thermally conductive phase changing compound optimising the thermal path e.g. between electronic packages and heat sinks. During warm-up the phase change compound starts filling up surface-specific roughnesses and unevennesses and expels any air enclosures from micro structures even at very low pressure. Both thin bondline and high thermal conductivity minimise the total thermal resistance. It can be pre-applied by screen printing. After drying the compound is dry-to-the-touch and ready for use on the thermal contact area. The compound is designed for applications with extended temperature requirements. TPC-X-PC-NC-HT-M and TPC-X-PC-NC-HT-E are printable compounds with alternatively long and extended dry times. TPC-X-PC-NC-HT-E dries only at elevated temperature.

PROPERTIES

- ☐ Optimal thermal contact by thin bondline
- ☐ Silicone-free
- ☐ Thermal conductivity: 3.0 W/mK
- ☐ Dielectric
- ☐ Thixotropic
- ☐ Ideal alternative and replacement of messy thermal grease
- ☐ Accurate automated application by stencil printing for mass production

5 GRAPHITE FOILS

/ ANISOTROPIC / PYROLYTIC

GRAPHITE FOIL TFO-S-CB

anisotropic

TFO-S-CB consists of more than 98% pure natural graphite. Due to the flake-like shape they show anisotropic thermal conductivities in-plane (x-y-plane) and in through direction (z-direction). Their softness allows for a good compliance to the contact surfaces. Thus the total thermal resistance is minimised. Their low densities compared to copper (15%) or aluminum (50%) make them ideal for applications where low weight is required. The very high temperature resistance allows for the use in extreme hot environments.

PROPERTIES

- ☐ Maximum contact through good surface compliance
- ☐ Very low weight
- ☐ Silicone-free
- ☐ Very high temperature resistance
- ☐ EMI-shielding through high electrical conductivity

AVAILABILITY

- ☐ Sheet 300 x 500 mm
- ☐ Roll 300 mm x 50 m
- ☐ Die cut parts
- ☐ Non adhesive (TFO-SXXX-CB)
- ☐ Adhesive on one side (TFO-SXXX-CB-A1)

APPLICATION EXAMPLES

Thermal link of:

- ☐ CPUs to heat sinks
- ☐ Power modules
- ☐ Semiconductors
- ☐ IGBTs

For use in Power inverters / Laptops / Automotive power supplies / Industrial PCs

PYROLYTIC GRAPHITE FOIL TFO-V-PG

highly anisotropic conductive

TFO-V-PG consists of pure pyrolytic graphite. Due to the synthetic structure it shows highly anisotropic heat spreading conductivities in-plane (x-y-plane) and in through direction (z-direction). Its flexibility allows for a good compliance to the contact surfaces. Thus the total thermal resistance is minimised. Their low densities make them ideal for applications where low weight is required. The very high temperature resistance allows for the use in extreme hot environments. Due to its high flexibility it is very bending-resistant and mechanically stable. It can be used for curved surfaces and corners because its thermal conductivity will remain unchanged in the absence of sharp folds. The film can be configured with phase change coating on both sides.

PROPERTIES

- ☐ Maximum contact through good surface compliance and high flexibility
- ☐ Very low weight
- ☐ Silicone-free
- ☐ Very high temperature resistance
- ☐ EMI-shielding through high electrical conductivity
- ☐ Ultra low water absorption

AVAILABILITY

- ☐ Sheet 203 x 355 mm (40 μm)
- ☐ Sheet 152 x 355 mm (70 / 100 μm) or on demand
- ☐ Roll 203 mm x 25 m (min.) (40 μm)
- ☐ Roll 152 mm x 25 m (min.) (70 / 100 μm)
- ☐ Non tacky (TFO-VXXX-PG)
- ☐ Tacky (TFO-VXXX-PG-A1)
- ☐ Phase change (TPC-VXXX-PG-CB)
- ☐ Die cut parts

APPLICATION EXAMPLES

Thermal link of:

- ☐ CPUs to heat sinks
- ☐ Laser diodes
- ☐ TEC modules

Shelf life adhesive: 6 months when stored in original packaging at room temperature and 50% relative humidity.

Thicknesses: 40 μm / 70 μm / 100 μm

PYROLYTIC GRAPHITE FOIL TFO-Y-PG

highly anisotropic conductive

TFO-Y-PG consists of pure pyrolytic graphite. Due to the synthetic structure it shows highly anisotropic heat spreading conductivities in-plane (x-y-plane) and in through direction (z-direction). Its softness allows for a good compliance to the contact surfaces. Thus the total thermal resistance is minimised. Their low densities make them ideal for applications where low weight is required. The very high temperature resistance allows for the use in extreme hot environments. Due to its flexibility it is bending-resistant. It can be used for curved surfaces and corners because its thermal conductivity will remain unchanged in the absence of sharp folds. Special configurations are dielectric with insulating films or laminated on flexible gap filler elastomers.

PROPERTIES

- ☐ Maximum contact through good surface compliance
- ☐ Very low weight
- ☐ Silicone-free
- ☐ Very high temperature resistance
- ☐ EMI-shielding through high electrical conductivity
- ☐ UL V0

AVAILABILITY

- ☐ Sheet 115 x 180 mm
- ☐ Sheet 180 x 230 mm (0.07 – 0.1 mm Thickness)
- ☐ Non adhesive (TFO-YXXX-PG)
- ☐ Adhesive (TFO-YXXX-PG-A1)
- ☐ Die cut parts

APPLICATION EXAMPLES

- Thermal link of:
- ☐ CPUs to heat sinks
 - ☐ Laser diodes
 - ☐ TEC modules
- For use in high end computers / Analyzers / Photonics

PYROLYTIC GRAPHITE FOIL TFO-ZS-PG

soft, anisotropic highly conductive

TFO-ZS-PG consists of pure soft pyrolytic graphite. Due to the synthetic structure it shows a high anisotropic heat spreading conductivity in-plane (x-y-plane) and an outstanding thermal conductivity in through thickness direction (z-direction). Its flexibility and softness allow for a very good compliance to larger uneven contact surfaces such as IGBT base plates. Thus the total thermal resistance is minimised. Compared to copper or aluminum the material is ideal for applications where low weight is required. The very high temperature resistance allows for the use in extreme hot environments.

PROPERTIES

- ☐ Maximum contact through good surface compliance
- ☐ Very soft
- ☐ Very low weight
- ☐ Silicone-free
- ☐ Extremely temperature resistant
- ☐ EMI-shielding through high electrical conductivity

6 PSA INSULATING TAPES

/ ACRYLATE / SILICONE

PSA INSULATING TAPE TAT-J-PE

acrylate adhesive with polyester insulating film

TAT-J-PE is a thermally conductive PSA tape with an electrically insulating polyester film reinforcement. Through the thermally conductive acrylate adhesive coated on both sides of the polyester film the thermal contact is highly improved even at low pressures. Convex and concave surface structures and stack up tolerances are effectively compensated. Materials with different expansion coefficients can easily be bonded. Thus the total thermal resistance is minimised. The tape works well for realizing an effective and cost efficient thermal coupling in a broad field of applications. Above all it is used in applications having little space only and where the permitted weight is limited. Using screws, springs, clips as mechanic fasteners thus becomes superfluous.

PROPERTIES

- ☐ Low thermal resistance
- ☐ High dielectric strength
- ☐ Reliable strong adherence on uneven or hardly machineable surfaces
- ☐ Silicone-free
- ☐ Neither mixing of components nor curing processes
- ☐ High mechanical stability and an easy handling through polyester film
- ☐ Replacement of fasteners e.g. screws, clips, etc.

AVAILABILITY

- ☐ Sheet
- ☐ Roll 10 ~1,000 mm x 20 m
- ☐ Both side tacky [TAT-J200-PE]
- ☐ Die cut parts
- ☐ Kiss cut parts on sheet

APPLICATION EXAMPLES

Thermal link of:

- ☐ LEDs
 - ☐ CPUs
 - ☐ RDRAM memory modules
 - ☐ Flip Chips, DSPs, BGAs, PPGAs
 - ☐ MOSFETs to heat sinks
- For use in Power supplies / PCs / Telecom engineering / Automotive applications / LED arrays

PSA TAPE TAT-M-SI

silicone adhesive, thermally conductive

TAT-M-SI is a thermally conductive electrically insulating silicone PSA transfer tape. Through the thermally conductive adhesive the thermal contact is highly improved even at low pressures. Convex and concave surface structures and stack up tolerances are effectively compensated. Materials with different expansion coefficients can easily be bonded. Thus the total thermal resistance is minimised. The tape works well for realizing an effective and cost efficient thermal coupling in a broad field of applications. Above all it is used in applications having little space only and where the permitted weight is limited. Using screws, springs, clips as mechanic fasteners thus becomes superfluous.

PROPERTIES

- ☐ Low thermal resistance
- ☐ Thermal conductivity: 1.0 W/mK
- ☐ High dielectric strength
- ☐ Reliable strong adherence on uneven or hardly machineable surfaces
- ☐ Neither mixing of components nor curing processes
- ☐ Replacement of fasteners e.g. screws clips, etc.

AVAILABILITY

- ☐ Sheet 300 mm x 400 mm
- ☐ Roll 300 mm x 50 m
- ☐ Both side tacky
- ☐ Die cut parts

APPLICATION EXAMPLES

Thermal link of:

- ☐ CPUs
- ☐ RDRAM memory modules
- ☐ Flip Chips, DSPs, BGAs, PPGAs

7 THERMAL GREASE

/ SILICONE / SILICONE-FREE

SILICONE-FREE THERMAL GREASE TGR-J-NS

highly thermally conductive

TGR-J-NS is high performing silicone-free thermal grease based on an ester oil matrix. It is ideal for use in applications where a very good and highly reliable thermal transfer must be achieved. Due to the specific formulation and filling with ceramic particles the material has a high thermal conductivity. By its use the thermal contact is maximised, hence the total thermal resistance is minimised.

PROPERTIES

- ☐ Thermal conductivity: 2.0 W/mK
- ☐ Silicone-free
- ☐ Dispensable
- ☐ Almost zero pressure at assembly
- ☐ Dielectric strength
- ☐ Operating temperature range: -40 to 150°C

AVAILABILITY

- ☐ Syringes 70 ml
- ☐ Jars 1 kg

APPLICATION EXAMPLES

Thermal link of:

- ☐ LED Boards
- ☐ Power modules

8 ADHESIVES

/ ADDITIONAL CURING /
CONDENSATIONAL CURING

SILICONE ADHESIVE TAD-G-SI-1C

thermally conductive 1 part / addition cure

TAD-G-SI-1C is a liquid addition cure corrosion-free highly thermally conductive 1 part silicone adhesive. It cures at elevated temperature over 100°C to a strong but still elastic rubber and exhibits excellent primerless adhesion to most surfaces. The adhesive features good thermal conductivity. It allows for being operated at temperatures up to 260°C and does not corrode copper or its alloys when fully cured. It is characterised by high resistance to water, acids, bases and most organic solvents and is especially suitable for applications where high thermal conductivity, adhesion, fast curing and controlled, precision application are essential.

PROPERTIES

- ☐ Thermal conductivity: 1.38 W/mK
- ☐ High bonding properties
- ☐ Heat addition cure
- ☐ Non corrosive
- ☐ High operating temperatures up to 260°C
- ☐ Extraordinary chemical resistance and longterm stability

AVAILABILITY

- ☐ 1 kg jars
- ☐ Bulk packaging options on request
- ☐ Optional with glass beads

APPLICATION EXAMPLES

- ☐ LED systems
- ☐ Processor cooling
- ☐ Memory chip assembly
- ☐ CPU board

SILICONE ADHESIVE TAD-O-SI-1C

thermally conductive 1 part / addition cure

TAD-O-SI-1C is an addition cure corrosion-free highly thermally conductive 1 part silicone adhesive. It cures at elevated temperature over 100°C to a strong but still elastic rubber and exhibits excellent primerless adhesion to most surfaces. The adhesive features high thermal conductivity and a thixotropic rheology that will prevent slumping or flow during the process. It allows for being operated at temperatures up to 210°C and does not corrode copper or its alloys when fully cured. It is characterised by high resistance to water, acids, bases and most organic solvents and is especially suitable for applications where high thermal conductivity, adhesion, fast curing and controlled, precision application are essential.

PROPERTIES

- ☐ Thermal conductivity: 2.1 W/mK
- ☐ High bonding properties
- ☐ Heat cure
- ☐ Non corrosive
- ☐ Thixotropic rheology preventing flow during the process
- ☐ High operating temperatures up to 210°C
- ☐ Extraordinary chemical resistance and longterm stability

AVAILABILITY

SILICONE ADHESIVE TAD-P-SI-1C

thermally conductive 1 part / RTV condensation cure

TAD-P-SI-1C is a condensation curing, non-corrosive highly thermally conductive 1 part silicone adhesive. It vulcanises at room temperature (RTV) to a strong but still elastic rubber and exhibits excellent primerless adhesion to most surfaces. Due to rapid acetone curing while being in contact with atmospheric moisture it is solvent free. The adhesive features good thermal conductivity and a thixotropic rheology that will prevent slumping or flow during the process. It allows for being operated at temperatures up to 220°C and does not corrode copper or its alloys when fully cured. It is characterised by high resistance to water, acids, bases and most organic solvents and is especially suitable for applications where high thermal conductivity, adhesion, fast curing and controlled, precision application are essential.

PROPERTIES

- ☐ Thermal conductivity: 2.3 W/mK
- ☐ High bonding properties
- ☐ Cures at room temperature (RTV condensation cure)
- ☐ Fast skinning
- ☐ Low linear shrinkage
- ☐ Non corrosive
- ☐ Thixotropic rheology preventing flow during the process
- ☐ High operating temperatures up to 220°C
- ☐ Extraordinary chemical resistance and longterm stability

AVAILABILITY

- ☐ 310 ml cartridges
- ☐ Bulk packaging options on request
- ☐ Optional with glass beads

SILICONE ADHESIVE TAD-U-SI-1C

thermally conductive 1 part / RTV condensation cure

TAD-U-SI-1C is a condensation curing, non-corrosive highly thermally conductive 1 part silicone adhesive. It vulcanises at room temperature (RTV) to a strong but still elastic rubber and exhibits excellent primerless adhesion to most surfaces. Due to rapid alcoxidic curing while being in contact with atmospheric moisture it is solvent free. The adhesive features very high thermal conductivity and a thixotropic rheology that will prevent slumping or flow during the process. It allows for being operated at temperatures up to 230°C and does not corrode copper or its alloys when fully cured. It is characterised by high resistance to water, acids, bases and most organic solvents and is especially suitable for applications where very high thermal conductivity, adhesion, fast curing and controlled, precision application are essential.

PROPERTIES

- ☐ Thermal conductivity: 3.27 W/mK

POLYURETHANE ADHESIVE TAD-N-PU-2C

thermally conductive / 2 part / dispensable / Form-in-Place

TAD-N-PU-2C is a thermally conductive two part thixotropic PU-adhesive with thermally conductive fillers in both components. It cures once the two parts come into contact without requiring heat or primer. It has good wetting and high bonding adhesion to most surfaces. The system cures at room temperature or by accelerated heat. Because of its thixotropic properties, the material can also be used as dispensable 2 part form-in-place gap filler that cures precisely positioned in place. This allows for compensating extreme tolerances and spaces at non-coplanar systems.

PROPERTIES

- ❑ Thermal conductivity: 2 W/mK
- ❑ Very high bonding properties
- ❑ Extraordinary chemical resistance and longterm stability
- ❑ Zero stress on components
- ❑ Heat accelerated curing

AVAILABILITY

- ❑ 400 ml (2 x 200 ml) twin cartridges
- ❑ 2 x 1 kg cans
- ❑ 18 l in pails

APPLICATION EXAMPLES

- ❑ LED systems
- ❑ Processor cooling
- ❑ Memory chip assembly
- ❑ CPU boards
- ❑ EHV battery systems

9 **POTTING GEL**

SILICONE POTTING GEL TCR-D-SI-2C

dispensable / 2 parts

TCR-D-SI-2C is a 2-part addition cure silicone potting compound which is filled with thermally conductive fillers of high temperature stability. After curing the system remains elastic. It is characterised by very good dielectric and mechanic properties and is suited for encapsulating electric and electronic parts such as transformers, capacitors, inductors, sensors, LEDs and can be moulded or dispensed at normal conditions at room temperature or in vacuum. Its rheologic behaviour allows for usage in geometries that are difficult to access.

PROPERTIES

- ☐ Silicone
- ☐ 2 part addition cure
- ☐ Thermal conductivity: 0.68 W/mK
- ☐ Remains elastic after curing
- ☐ Almost zero stress on components
- ☐ Dispensable or mouldable
- ☐ High resistivity against water and humidity
- ☐ Shock absorbing

AVAILABILITY

- ☐ 2 kg / 40 kg (2 x 20 kg) AB Kit

APPLICATION EXAMPLES

Thermal link of:

- ☐ Inductors
- ☐ Capacitors
- ☐ Heat Pipes
- ☐ BGA

For use in Automotive applications
/ Telecommunication / Controlling
units / Industrial PCs

SILICONE POTTING GEL TCR-H-SI-2C

dispensable / 2 parts / low viscosity

TCR-H-SI-2C is a 2-part addition cure silicone potting compound which is filled with thermally conductive fillers of high temperature stability. It is characterised by very good dielectric and mechanic properties and is suited for encapsulating electric and electronic parts such as transformers, capacitors, inductors, sensors, LEDs and can be moulded or dispensed under normal conditions at room temperature or in vacuum. Its rheologic behaviour allows for usage in geometries that are difficult to access.

PROPERTIES

- ☐ Silicone
- ☐ Low viscosity
- ☐ 2 part addition cure
- ☐ Thermal conductivity: 1.2 W/mK
- ☐ Almost zero stress on components
- ☐ Dispensable or mouldable
- ☐ Heat accelerated curing
- ☐ High resistivity against water and humidity
- ☐ Shock absorbing

AVAILABILITY

- ☐ 2 kg / 10 kg (2 x 5 kg) AB Kit

APPLICATION EXAMPLES

Thermal link of:

- ☐ Inductors
 - ☐ Capacitors
 - ☐ Heat Pipes
 - ☐ BGA
- For use in Automotive applications
/ Telecommunication / Controlling
units / Industrial PCs

POLYURETHAN POTTING GEL

TCR-J-PU-2C-LV-AR

dispensable / 2 parts / low viscosity

TCR-J-PU-2C-LV-AR is a 2-part addition cure polyurethan potting compound which is filled with thermally conductive fillers of high temperature stability. It is characterised by very good dielectric and mechanic properties and is suited for encapsulating electric and electronic parts such as transformers, capacitors, inductors, sensors, LEDs and can be moulded or dispensed under normal conditions at room temperature or in vacuum. Its rheologic behaviour allows for usage in geometries that are difficult to access.

PROPERTIES

- ☐ Polyurethan
- ☐ Low viscosity
- ☐ 2 part addition cure
- ☐ Thermal conductivity: 1.5 W/mK
- ☐ Almost zero stress on components
- ☐ Dispensable or mouldable
- ☐ Solvent-free
- ☐ High resistivity against water and humidity
- ☐ Free of halogenated flame retardants

AVAILABILITY

- ☐ Tinline container

APPLICATION EXAMPLES

Thermal link of:

- ☐ Inductors
 - ☐ Capacitors
 - ☐ LED
 - ☐ Battery packs
- For use in Automotive applications
/ Telecommunication / Controlling
units / Industrial PCs

10 HALA CLIPS

/ SINGLE SCREWING CLIPS

HALA CLIP TO 220-1

The single screwing clip HALA Clip TO 220-1 allows for a strong springy fixing of a semiconductor in a TO220 or comparable package and exerts a reliable pressure onto heatsinks. It can be easily fastened by use of M4 screws. Due to its particular shape an optimum mechanic stress behaviour within a wide operating range is achieved thus avoiding any overstrains of the material at the load limits. Even in case of maximum TO 220 tolerances the forces still suffice to generate adequate pressures. Through the special clip geometry the forces operate concentrated on the semiconductor package plates thus maximizing the contact zone and minimizing the thermal resistance. Due to the special surface treatment the clip is protected against corrosion.

PROPERTIES

- ☐ Fixing by M4-screw
- ☐ FE-simulation optimised stress behaviour
- ☐ Mounting friendly design
- ☐ Sufficient pressure even at minimum package height (ca. 3.5 mm for TO 220)
- ☐ Anticorrosive by Delta Seal surface treatment
- ☐ Easy chip identification by apertures

OPERATING RANGE

- ☐ Force range: ca. 55 – 85 N
- ☐ Pressure range: ca. 35 – 55 N/cm² (50 – 80 PSI) for different types of TO 220 packages (Surface area TO220 ca. 1.6 cm²)

APPLICATION EXAMPLES

Fixing of semiconductors in TO220 or comparable packages onto heatsinks:

- ☐ MOSFETs and IGBTs
- ☐ Diodes and rectifiers
- ☐ Electronic modules

For use in switch mode power supplies / UPS units / Motor control units / Automotive applications / Solar technology

Dimensions

Force vs. Deflection

HALA CLIP TO 247-1

The single screwing clip HALA Clip TO 247-1 allows for a strong springy fixing of a semiconductor in a TO247 or comparable package and exerts a reliable pressure onto heatsinks. It can be easily fastened by use of M4-screws. Due to its particular shape an optimum mechanic stress behaviour within a wide operating range is achieved thus avoiding any overstrains of the material at the load limits. Even in case of maximum TO 247 tolerances the forces still suffice to generate adequate pressures. Through the special clip geometry the forces operate concentrated on the semiconductor package plates thus maximizing the contact zone and minimizing the thermal resistance. Due to the special surface treatment the clip is protected against corrosion.

PROPERTIES

- ☐ Fixing by M4-screw
- ☐ FE-simulation optimised stress behaviour
- ☐ Mounting friendly design
- ☐ Sufficient pressure even at minimum package height (ca. 4.7 mm for TO 247)
- ☐ Anticorrosive by Delta Seal surface treatment
- ☐ Easy chip identification by apertures

OPERATING RANGE

- ☐ Force range: ca. 95 – 110 N
- ☐ Pressure range: ca. 28 – 32 N/cm² (40 – 47 PSI) for different types of TO247 packages (Surface area TO247 ca. 3.4 cm²)

APPLICATION EXAMPLES

Fixing of semiconductors in TO247 or comparable packages onto heatsinks:

- ☐ MOSFETs
- ☐ IGBTs
- ☐ Diodes

For use in switch mode power supplies / UPS units / Motor control units / Automotive applications
